After only a short time in business, there are many exciting new products Coming to the 3rd Arm line that we feel will even further revolutionize the outdoor video industry. After visiting with literally hundreds of different customers and listening to their request, we feel that we have taken an already successful product and made it even better! The # 1 request was for a lighter 3rd Arm model that still had the strength & versatility as the original 3rd Arm, and thus the 3rd Arm Elite was born! The Elite models are crafted out of aircraft-grade Aluminum, with heavy duty parts and a non-stretch ratchet strap, all weighing only 6.8 lbs. This makes them an amazing 46% lighter while still maintaining the units overall strength & versatility. Our customers also requested the option of having the 3rd Arm camouflaged in their favorite camo pattern. Well, now that option is a reality! We have teamed up with many of the major camouflage companies to offer you the option of customizing your 3rd Arm camera support system in 5 popular camo patterns!

The 3rd Arm Elite comes in two different sizes for both smaller HD cameras as well as larger, heavier cameras. Both models, the 3rd Arm Elite and the 3rd Arm Extreme Elite, are built out of the same aircraft grade Aluminum with a hardened steel pin that slides into the 3rd Arms universal mounting base! This gives videographers the ability to use both of the 3rd Arm camera arms with the same universal mounting base by simply switching out the different size camera arms to match your camera of choice.

The 3rd Arms's patented mounting base has revolutionized camera arm support systems! With its ability to be attached to almost any tree, no matter how crooked it is, the 3rd Arm can be adjusted 30 degrees side to side and nearly 45 degrees up and down. All of this is accomplished with ease through the 3rd Arms quick adjust tension handles. New to our universal base is our all new self lubricating receiver bushing which allows for not only quieter insertion of your 3rd Arm into the base, but also a smoother, more fluid swing of the camera arm around the tree!

The 3rd Arm product line has been tested extensively by veteran video producers with over 30 years experience in the field. The latest improvements and additions to the 3rd Arm line of products leaves no doubt that we now offer the Ultimate Video Camera Support System!
