

## Big Game Boss Extreme Hang On Stand

Review By: Dave Ziegler.

<http://www.biggametreestands.com>

To say the very least, I am a guy who would prefer to keep his feet planted firmly on the ground, rather than crawling twenty plus feet up a live oak tree, situated on the side of a deep ravine with a nearly forty foot drop to the jagged rock stream bed below. With that said, this creates a major problem for me. You see, in order to consistently put big whitetail bucks on the ground, you gotta go high and you gotta go high in the areas where those bucks live.

For the majority of my twenty plus years of bow hunting, I have spent my time chasing whitetails from the ground or from a perfectly pencil straight tree that was just big enough around to accommodate my large heavy, Volkswagen like climbing stand. I think you see my dilemma.

For me, this all changed this year when I hunted with Aaron Milliken at Midwest Trophy Outfitters in West Central Illinois. Each day, ten to twelve hours of my five day trip was spent perched in a Boss Extreme Hang on stand from Big Game. I can firmly say that my opinion has clearly changed.

I have never felt more comfortable in a hang on stand than I did during those five days of hunting. When put together with twenty four feet of Big Game Quick Sticks, I was able to hunt in areas where my old faithful climber was just never going to take me. I found out very quickly, that this was the way to go. Once I climbed in the stand for the first time, it was easy to see that the set up was more than solid and the climbing sticks made for a quick easy and SAFE ascent and made coming out of the stand in the dark a breeze.

So, if you are like me and you have shied away from the popular hang on model stands. Do yourself a favor and try the Boss Extreme Hang On line from Big Game! You won't second guess it!

Some Stats:

**Large platform**  
**Comfortable 2"-thick seat cushion**  
**Rugged steel construction with powder-coated finish**  
**Built in footrest for added comfort**  
**Shooting rail flips up out of the way when not in use**

**Seat height:** 22"

**Platform size:** 34" x 25"

**Weight:** 27 lbs.

**Weight capacity:** 300 lbs.
